TILE

Your kitchen backsplash is a personality piece. The tiles you choose to spruce up the wall space between the countertop and cabinets and above the range, should showcase the color scheme and theme of your kitchen, whether it's contemporary or traditional. Ultimately, your backsplash is a focal point and an opportunity to be creative. To make the process easier, we can provide some guidelines for selecting the right tile for you!

Granite & Quartz Tops is one of Northwest Indiana's premier granite shop. We utilize only the highest quality materials, the latest in fabrication technology, and installation techniques according to the Marble Institute of America (MIA). With 100's of in stock and special order materials located at our Mokena facility, one of GQTops' certified Architects or Designers will guide you through each step of your design and selection process. You are free to select material from our stock or from one of the many suppliers in the area. All slabs are inspected upon arrival.

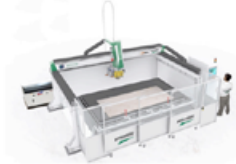

GQTops uses the latest in digital templating. With our Laser Templator, we have significantly increased efficiency and accuracy. The LT-2D3D can capture measurements as close as 2 inches and as far away as 325 feet, while still carrying the tightest tolerance on the market of ± 1 mm, reports Laser Products Industries.

In addition to our Laser Templator, GQTops can now upload those measurements into our Slabsmith Perfect Match where we can create a digital layout of your space. This way we can better match patterns in the stone so your counters appear virtually seamless and visually pleasing.

Powered by a numerical control interfaced with CAD/CAM systems and by a dedicated software WJ CAM, our Waterjet can cut any type of stone. It makes straight, inclined and shaped cuts, as well to create inlays.

GQTops also utilizes a computerized wet bridge saw for initial and straight cuts and a CNC machine for custom curves, edges and details. Final Milling, shaping and all sink cutouts are completed using our Breton CNC.

GQTops is committed to providing our homeowners, contractors and designers alike, a pleasurable experience resulting from superior value, professional color coordination, quality and service. Thank you for considering **Granite & Quartz Tops** for your project. We look forward to working with you.
